CERTIFICATIONS

- 1. Infoblox CDCA
- 2. Zscaler ZCCA-IA,ZCCP-IA,ZCCA-PA,ZCCP-PA,ZCDS,ZCSE.
- 3. CyberArk Defender, CyberArk Sentry
- 4. TrendMicro Foundation, Advance User, HybridCloud
- 5. Infoblox Core DDI Advanced Troubleshooting (CDAT) v8.0
- 6. Infoblox Secure DNS Configuration & Administration (SDCA) 8.1
- 7. DDIP – DDI Professional
- 8. BeyondTrust BCIE
- 9. Arbor APS Specialist
- 10. Tenable.sc CV Certificate of Proficiency
- 11. CyberArk CDE
- 12. Zscaler delivery specialist

DEEP AND BROAD KNOW-HOW

- (i) Infoblox DDI, DNS Security, DNS Firewall, Advance DNS Protection, Network Insight Network management
- (i) Infoblox Administration
- (i) Beyond Trust PAM solution deployment and planning
- (i) Beyond Trust Password safe Administration and troubleshooting
- (i) CybaerArk PAM
- (i) Tenable VMA
- (i) Active Directory synh and user managemnt through BT PAM
- (i) Tenable security center planning,deployment, administration adn Troubleshooting
- (i) Zscaler Internet Access and Private access planning, deployment, administration adn Troubleshooting
- (i) TrendMicro DDI and DDAN
- (i) FortiPAM
- (i) A10 SLB, and Partitioning
- (i) Various Operating Systems, such as, Windows Server 2003, 2008, 2012, Ubuntu, and CentOS

EMPHASIS ON WORK

- (i) Specialized in delivering customized network and security solutions with a focus on Infoblox DDI, BeyondTrust PAM, Zscaler ZIA/ZPA, and Tenable Vulnerability Scanner. Experienced in guiding clients through the entire project lifecycle, from requirement analysis and design to implementation, configuration, and ongoing support. Comfortable working with diverse clients to optimize security infrastructure and enhance business operations. Strong problem-solving skills and a collaborative approach to working with cross-functional teams.
- (i) Infoblox DDI: DNS, DHCP, and IP Address Management (IPAM) deployment and management Grid architecture implementation and troubleshooting Enhancing network automation, security, and performance through centralized DDI solutions
- (i) BeyondTrust Privileged Access Management (PAM): Installation, configuration, and management of BeyondTrust PAM for controlling privileged access Integration with various identity and access management solutions (Active Directory, LDAP) Ensuring compliance through privileged session monitoring and auditing
- (i) Zscaler ZIA (Internet Access) & ZPA (Private Access): Configuring ZIA for secure internet access, threat protection, and policy enforcement Implementing ZPA for secure, zero-trust access to internal applications without VPNs Optimizing cloud security solutions and ensuring seamless application performance for remote users

- 
 Tenable Vulnerability Scanner: Configuring and running Tenable tools (Nessus, Tenable.io) for comprehensive vulnerability scanning and reporting Identifying, assessing, and remediating network vulnerabilities Integration with other SIEM and security tools to enhance overall security posture
- 
 Endpoint Security: Configuring and managing endpoint security solutions to safeguard against malware, ransomware, and other advanced threats Implementing antivirus, EDR, and data protection policies for end-user devices Regular monitoring, updates, and response to endpoint security incidents
- 
 TrendMicro SandBox : Configing and Managing TrendMicor DDI and DDAN Solutions.
- 
 CyberArk (PAM): Setup and configuration of CyberArk Privileged Access Security tools Securing privileged accounts and managing credentials using CyberArk Vault Limited experience with CyberArk Session Manager and Password Vault Web Access (PVWA).
- 
 Client Needs Assessment: Expertise in conducting detailed assessments to identify and meet client security and networking requirements.
- 
 Solution Deployment: Experience in managing end-to-end deployment of security tools, ensuring smooth implementation and performance.
- 
 Technical Troubleshooting: Strong ability to diagnose and resolve issues across multiple platforms, including Infoblox, BeyondTrust, Zscaler, and Tenable
- 
 Endpoint Security Management: Experience in deploying endpoint security solutions to protect client environments from cyber threats.
- 
 Training & Knowledge Transfer: Providing hands-on training, creating user documentation, and offering ongoing support to ensure solution effectiveness.
- 
 Cross-Functional Collaboration: Skilled in working closely with teams, stakeholders, and third-party vendors to ensure projects are delivered on time and within scope.

RECENT PROJECT EXPERIENCE

- 
 Completed Beyondtrust Password safe deployment for Fedent under Telecommunicationa and Regulatroy authority
- 
 Completed Infoblox migration for GASCO
- 
 Completed Infoblox migration and cloud deployment for ADIB
- 
 Beynd Trust password safe deployment for DED ABU Dhabi
- 
 Tenable solution for MOCA
