This report is intended solely for use by the management of Inspira and its user entities (i.e., customers) that use the services covered by this report during this period. Unauthorized use, reproduction, or distribution of this report, in whole or in part, is strictly prohibited.

Section I

Independent Service Auditor's Report Provided by Accorian Assurance

Independent Service Auditor's Report

To the Management of Inspira:

1. Scope

We have examined Inspira's accompanying description of the organization in Section III throughout the period April 1st, 2024 to March 31st, 2025 based on the criteria for a description of a service organization's system in DC Section 200, 2021 Description Criteria for a Description of a Service Organization's System in a SOC 2[®] Report (AICPA, Description Criteria) and the suitability of the design and operating effectiveness of controls stated in the description as to provide reasonable assurance that Inspira service commitments and system requirements were achieved based on the trust services criteria relevant to *'Security, Availability, Confidentiality, Processing Integrity, and Privacy'* (applicable trust services criteria) set forth in TSP Section 201, 2022 Trust Services Criteria for Security, Availability, Confidentiality, Process Integrity and Privacy (AICPA, Trust Service Criteria).

Inspira utilizes a subservice organization to host data over the cloud. The description indicates complementary subservice organization controls that are suitably designed and operating effectively, along with controls at Inspira to achieve Inspira service commitments and system requirements based on the applicable trust services criteria. The description presents Inspira controls, the applicable trust services criteria, and the types of complementary subservice organization control assumed in the design of Inspira controls. The description does not disclose the actual controls at the subservice organization. Our examination did not include the services provided by the subservice organization, and we have not evaluated the suitability of the design or operating effectiveness of such complementary subservice organization controls.

The description indicates that complementary user entity controls that are suitably designed and operating effectively are necessary, along with controls at Inspira, to achieve Inspira service commitments and system requirements based on the applicable trust services criteria. The description presents Inspira controls, the applicable trust services criteria, and the complementary user entity controls assumed in the design of Inspira controls. Our examination did not include such complementary user entity controls, and we have not evaluated the suitability of the design or operating effectiveness of such controls.

2. Service Organization's Responsibilities

Inspira is responsible for its service commitments and system requirements and for designing, implementing, and operating effective controls within the system to provide reasonable assurance that Inspira's service commitments and system requirements were achieved. Inspira has provided the accompanying assertion titled "Assertion of Inspira Management" about the description and the suitability of design and operating effectiveness of controls stated therein.

Inspira is also responsible for preparing the description and assertion, including the completeness, accuracy, and method of presentation of the description and assertion; providing the services covered by the description; selecting the applicable trust services criteria; stating the related controls in the description; and identifying the risks that threaten the achievement of the service organization's service commitments and system requirements.

3. Service Auditor's Responsibilities

Our responsibility is to express an opinion on the description and on the suitability of the design and operating effectiveness of controls stated in the description based on our examination. Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform our examination to obtain reasonable assurance about whether, in all material respects, the description is presented in accordance with the description criteria and whether the controls stated therein were suitably designed and operated effectively to provide reasonable assurance that the service organization's service commitments and system requirements were achieved based on the applicable trust services criteria. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

An examination of the description of a service organization's system and the suitability of the design and operating effectiveness of controls involves the following:

- Obtaining an understanding of the system and the service organization's service commitments and system requirements.
- Assessing the risks that the description is not presented in accordance with the description criteria and that controls were not suitably designed or did not operate effectively.
- Performing procedures to obtain evidence about whether the description is presented in accordance with the description criteria.
- Performing procedures to obtain evidence about whether controls stated in the description were suitably designed to provide reasonable assurance that the service organization achieved its service commitments and system requirements based on the applicable trust services.
- Testing the operating effectiveness of controls stated in the description to provide reasonable assurance that the service organization achieved its service commitments and system requirements based on the applicable trust services criteria; and,
- Evaluating the overall presentation of the description.

Our examination also included performing other procedures that we considered necessary in the circumstances.

4. Inherent Limitations

The description is prepared to meet the common needs of a broad range of report users and may not, therefore, include every aspect of the system that individual users may consider important to meet their informational needs.

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. Because of their nature, controls may not always operate effectively to provide reasonable assurance that the service organization's service commitments and system requirements are achieved based on the applicable trust services. Also, the projection to the future of any conclusions about the suitability of the design and operating effectiveness of controls is subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

5. Description of Tests of Controls

The specific controls we tested, and the nature, timing, and results of our tests are listed in Section IV.

Opinion

In our opinion, in all material respects,

- a) The description presents the Inspira system description that was designed and implemented throughout the period April 1st, 2024, to March 31st, 2025, in accordance with the description criteria.
- b) The controls stated in the description were designed as suitable throughout the period April 1st, 2024, to March 31st, 2025, to provide reasonable assurance that Inspira service commitments and system requirements would be achieved based on the applicable trust services criteria if its controls operated effectively throughout that period and if the subservice organizations and user entities applied the complementary controls assumed in the design of Inspira controls throughout that period.
- c) The controls stated in the description operated effectively throughout the period April 1st, 2024, to March 31st, 2025, providing reasonable assurance that Inspira service commitments and system requirements were achieved based on the applicable trust services criteria if complementary subservice organization controls and complementary user entity controls assumed in the design of Inspira controls operated effectively throughout that period.

6. Restricted Use

This report, including the description of tests of controls and results thereof in Section IV, is intended solely for the information and use of Inspira, Inspira user entities, and Inspira business partners during some or all of throughout the period April 1st, 2024, to March 31st, 2025, subject to risks arising from interactions with the Inspira, practitioners providing services to such user entities and business partners, prospective user entities and business partners, and regulators who have sufficient knowledge and understanding of the following:

- The nature of the service provided by the service organization.
- How the service organization's system interacts with user entities, business partners, subservice organizations, and other parties, Internal control, and its limitations.
- Complementary user entity controls and complementary subservice organization controls and how those controls interact with the controls at the service organization to achieve the service organization's service commitments and system requirements.
- User entity responsibilities and how they may affect the user entity's ability to effectively use the service organization's services.
- The applicable trust services criteria.
- The risks that may threaten the achievement of the service organization's service commitments and system requirements and how controls address those risks.

This report is not intended to be and should not be used by anyone other than these specified parties.
