ALPHA DATA P.J.S.C

Higher Colleges of Technology

RFP Ref. NE-26-0129 — Secure Access Service Edge (SASE) — 3 Years

SLA & Financial Commitments

Unconditional Acceptance — Escalation Matrix, Measurement Methodology, Security Efficacy
SLAs and Liquidated Damages

Portal Section 3 — Item 5 (Evaluation Criterion 3.5, Weight 5% — Full Acceptance Band)

Technical Submission — September 2026

Commercial-in-Confidence

Alpha Data accepts, without material deviation, every SLA and financial commitment in the RFP: the incident response and escalation matrix, HCT's measurement methodology and reclassification authority, the security-efficacy SLAs, availability and performance targets, and the liquidated damages and service-credit regime governed by HCT's Contract Terms and Conditions.

1. Formal Statement of Acceptance

Alpha Data P.J.S.C hereby confirms full and unconditional acceptance of Sections 3.14 (Service Level Agreements), 3.15.10 (Liquidated Damages for project delay) and all associated measurement, escalation and remedy provisions of RFP NE-26-0129, as summarised below. No exceptions or material deviations are taken.

2. Incident Response, Resolution and Escalation (3.14.1 – 3.14.3)

- P1–P4 response and resolution targets per the SLA matrix, backed by our 24x7x365 help desk and OEM TAC.
- Escalation matrix accepted through all levels, including Regional Director engagement with an action plan when a P2 remains unresolved at 16 hours.
- HCT's sole authority to reclassify incident priority, with SLA clocks resetting to the higher priority from reclassification (3.14.2.1).
- No ticket marked resolved/closed without HCT's written confirmation; SLA clock runs until confirmation; auto-close only after 3 business days of non-response with immediate re-open on recurrence (3.14.2.2).
- Third recurrence of substantially similar incidents within 30 days auto-escalates to P1 with comprehensive RCA and permanent-fix plan (3.14.2.3).

3. Availability and Performance SLAs (3.14.4, 3.8)

Metric	Target	Accepted
Overall platform availability	99.999% monthly, all PoPs serving HCT	Yes
SWG / FWaaS availability	99.999% each	Yes
RBI session launch	99.9% within 3 seconds	Yes
Management console availability	99.9%	Yes
DEM data freshness	< 5 minutes	Yes
ZTNA private access availability (optional)	99.99%	Yes
Added latency — SWG/FWaaS	≤ 25 ms	Yes
Added latency — full SSL + sandbox	≤ 50 ms	Yes
Per-user throughput	≥ 100 Mbps managed / ≥ 50 Mbps BYOD	Yes

4. Measurement Methodology (3.14.5)

- Real-time SLA dashboard accessible to HCT 24x7x365 with current and historical availability, latency, throughput and incident metrics.
- Independently verifiable measurement — never solely vendor self-reported; HCT's right to use its own synthetic monitoring accepted as an equal source of truth.
- Narrow exclusions only as written: HCT-side upstream network issues. Vendor internal issues — staffing, licensing disputes, sub-processor failures, cloud-partner outages — are explicitly NOT valid exclusions (3.14.5.4). Accepted.
- Chronic-failure remedy accepted: three or more months below 99.999% in any rolling 12 months entitles HCT to terminate for cause with transition assistance (3.14.5.6).

5. Security Efficacy SLAs (3.14.5.5)

Efficacy Metric	Target	Evidence Basis
False positive rate	< 0.1% of inspected sessions	Quarterly sampling report
Malware detection rate	> 99%	Industry-standard suites (AV-TEST / AMTSO)
Mean time to block — known IoC	< 60 seconds	FortiGuard telemetry + platform logs
Mean time to block — zero-day	< 24 hours	FortiGuard AI/sandbox pipeline evidence

6. Financial Remedies — Liquidated Damages and Service Credits

- Project-delay liquidated damages per Section 3.15.10 accepted, separate from and additional to operational SLA penalties after Go-Live; only delays caused solely by HCT are excluded — sub-contractor, resourcing and technology delays remain Alpha Data's responsibility.
- Operational SLA breaches governed by HCT Contract Terms and Conditions, with service credits, liquidated damages and other remedies determined and enforced by the HCT Contracts Team (3.14.6.1). Accepted.
- Financially backed availability service credits per 3.8.5. Accepted.

7. Commercial Terms Alignment (3.16.1)

- 3-year contract with yearly payment based on successful site acceptance; 3-year warranty and support for all subscriptions, licences and cloud services included at no additional cost.
- Price lock for the full term; growth (including the indicative 15% year-on-year user/device growth) absorbed within fixed pricing per HCT clarification Q.1/Q.3; additional users/campuses at or below original per-unit rates.
- HCT renewal/extension option at the same cost, and Year-3 benchmarking right, accepted.
