## SERVICES

People, technologies and organizations; all are measured by the services they provide, and we believe that even the best technology in the world has to satisfy its users' needs. This is why Fireware is committed to customer satisfaction as an essential element of designing our solutions. Packed with this culture in mind, we provide our clients the following services:

OFFENSIVE  
SECURITY

DEFENSIVE  
SECURITY

ANTI-  
MALWARE

FORENSICS

SYSTEM  
INTEGRATION

SYSTEM  
ADMINISTRATION

PROGRAMMING

CONTINUOUS  
SUPPORT

# OVERVIEW

Fireware is a specialized information security solution provider based in EMEA. We strive to deliver the highest-quality service to the business and its people. To us, “quality” means providing efficient, reliable and secure networks to our customers accompanied by our people-to-people post-sales support services. For you, our customer, it means that you get the care you need when you need it.

## 01 | We work in a different horizon

While the concentration of most rivals in the industry is selling more and more products, our main aim and true focus is understanding the real risk and building a dynamic system that adapts to new types of threats instead of chasing the tail of hackers by stacking products that are completely reactive in nature.

## 02 | Beyond business

Beyond business Fireware is committed to market the concept of open source and constructive collaboration between information security technologies regardless of the financial gain. We train and educate professionals to embrace a new way of thinking to better understand and defend against hackers unpredictable methods.

## VISION

To influence a positive change in IT. To bring technology closer to people. To improve their quality of life.

## MISSION

To provide competent, innovative, and responsive solutions and services for our customers. While we endeavour to build a world-class expertise in our

domain, we continuously study the various business verticals to be able to provide business-aware solutions rather than technology-centric solutions.

## VALUES

We operate within strict legal and ethical guidelines. We will always commit to guide our customers in an honest manner towards addressing their requirements from an independent, neutral approach. We will never compromise the confidentiality, integrity, or availability of our clients.

# SOLUTIONS

We apply our patent model for building creative service delivery solutions: Analyse, Detect, Act, Monitor (ADAM). ADAM is carefully chosen to address the various phases of application delivery needs as illustrated below.

## ANALYSE

The analysis phase is essential to understand how production networks and systems should work for a particular customer. In order to identify network pain points, we apply extensive algorithms inspired by humane medical treatments. This involves the following factors: History, configuration, demography, compliance, risk and feasibility. Through manual and machine methods, we extract, analyse and prioritise information.

NETWORK

VULNERABILITY  
ASSESSMENT

## DECIDE

The ability to have quick, firm, yet accurate and correct decisions is a key factor for successful information security system. In this phase, we focus on the strategic level and the overall information security management framework rather than specific technologies. The goal is to unite the isolated decision entities and apply an effective decision making system.

Inspired by medical decision making, we categorise the decision making phase in four levels: Straight Forward; Low Complexity; Moderate Complexity; and High Complexity. This involves the following factors: number of possible solutions, problem data amount and complexity, and risk of business impact. The outcome of this process, the decision, is fed into the next phase which ensures an optimal action.

## ACT

We believe in organic growth for networks. Transforming legacy networks into next generation does not mean starting from scratch. When we introduce a solution to an identified problem, we examine the interaction through which the newly introduced solution delivers its planned effect. By implementing this approach, we ensure efficient use of resources, feasibility, quicker time to realise solution value, robustness, and ability to adapt to future needs.

NETWORK SECURITY  
(FIREWALLS, IDS/IPS,  
VPN, NAC, UTM)

WEB APPLICATION  
SECURITY

DATA TRAFFIC STEERING

ENDPOINT SECURITY  
AND CONTROL

IDENTITY MANAGEMENT,  
SINGLE SIGN ON, AND  
MULTI FACTOR  
AUTHENTICATION

CONTENT SECURITY,  
WEB FILTERING AND  
APPLICATION  
CONTROL

## MONITOR

When the number of corporate users increases and network resources grow up, the ability to monitor the status of the network and security infrastructure become a critical success factor for IT managers. We help you to implement a centralised monitoring system to observe the small details that may affect the big picture. Keeping an eye on every resource in your infrastructure eliminates hard time surprises and ensures smooth and continuous business operations.

SECURITY INFORMATION  
& EVENT MANAGEMENT

**IN SHORT,  
WE CAN  
HELP  
YOU TO:**

Take better decisions when it comes to information security, thanks to our business intelligence overlay that feeds from all sources of information in the network and provide clear and visual representation of information security posture and hidden risks.

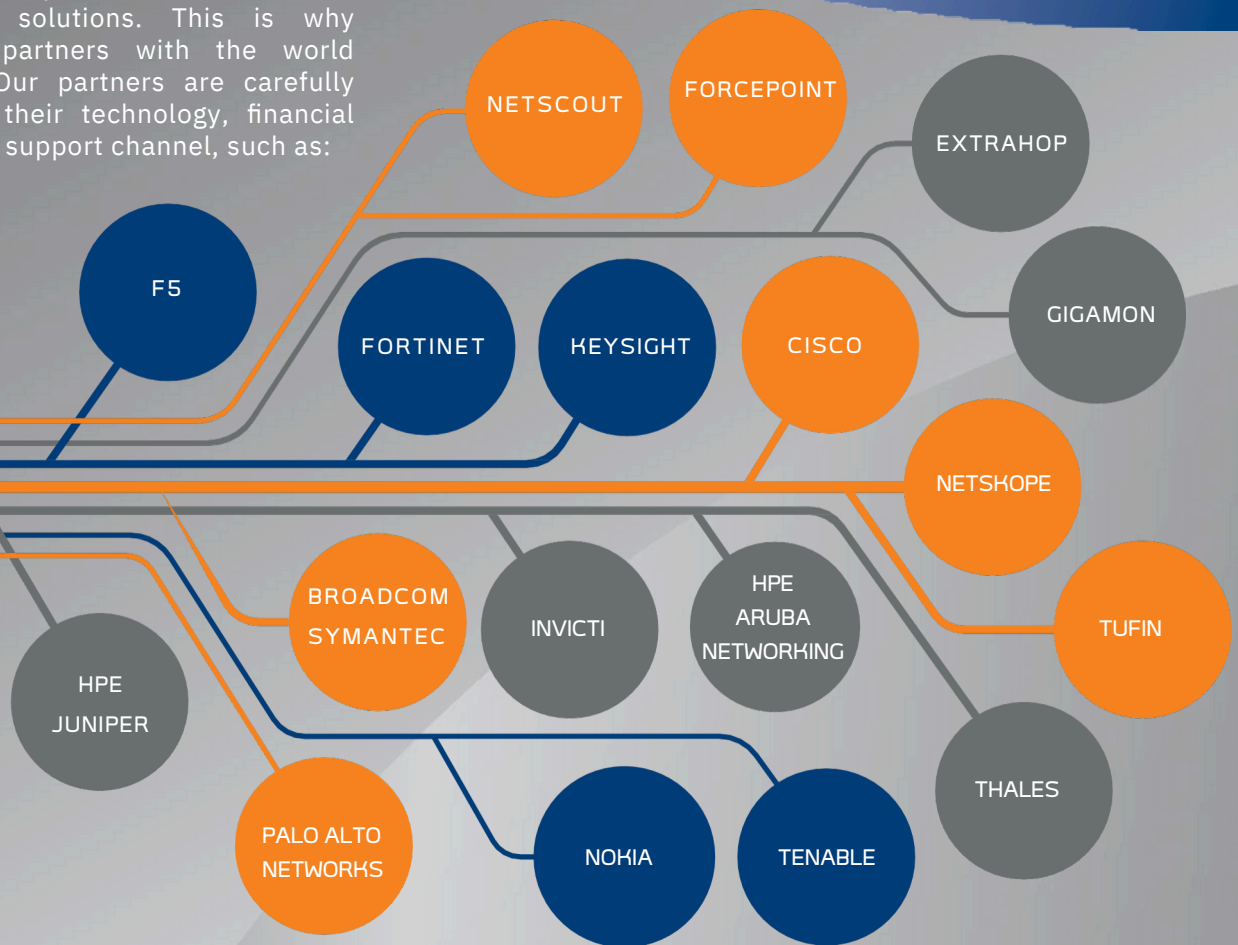

Effectively plan, design, implement, support and monitor a highly secured IT environment while optimising the delivery of the IT services in the organization. Our unique model, ADAM, is designed to ensure the quality of our work.

Have the peace of mind needed to operate a proactive, efficient and highly secure technologies through continuous knowledge transfer and active-consultative involvement thanks to our agile project management methodology.

## OUR PARTNERS

We are committed to provide our clients with the best-in-class solutions. This is why Fireware always partners with the world leading vendors. Our partners are carefully chosen based on their technology, financial stability and strong support channel, such as:

### ABU DHABI

P.O. Box 111241  
Office no. 403, World Trade  
Center Mall  
Hamdan Bin Mohammed St,  
405 Al Danah
